

I drive the Dallas Ft Worth metroplex daily and listen to XM traffic and weather report all day to help me get around the wrecks and traffic delays. Where as the local stations only give you a update 4 times a hour. In those 15 minutes a wreck could happen and I would be sitting in a 5 mile backup. Which wastes my time and also gas. It would be a big injustice if you took this service away from satellite radio such as XM Radio. There is very limited commercial breaks on XM where as on local radio stations such as WBAP there is atleast 20 minutes of commercials per hour.

Thank you,

Michael Smith
